Totaliser

RS-485 RS-232 4G

Features

- Menu based system configuration.
- Onsite back up facility to pen drive / laptop.
- User friendly GUI / Browser PC interface.
- To connect Analog Sensors and Digital Sensors.
- User programmable logging interval of the measured parameters.
- One Year data internal storage capability.
- System Parameters configurable through user interface.
- Wi-Fi support.
- Data communication through 4G modem

Application Areas

Energy Meter Data Collection

Customized Application

Product Description

The Totalizer is the Communication device to read the Energy Meter Data through RS485 network. Totalizer is 4 no's RS485 port and all RS485 Ports are communicating to Energy Meters Parallel mode as per configuration. After completion of Meter reading on specified interval (15 / 30 / 60 min) display the all energy meters data in summation values as per configuration. Totalizer is periodically read the Energy Meter and refreshes the Energy values on Display. This data will be stored in Memory and will be transmitted to the server through GSM/GPRS Communication.

Technical Specifications

Processing System	: High speed Cortex Processor with Linux OS
Meter Data	: Meter data reading through Low Power RF Module
Display	: 3.5" TFT LCD colour Display
Keyboard	: Industrial grade keypad or touch pad on display
Ports	: 1-RS-232 / 4 - RS-485 & USB 2.0
Ethernet Port	: 2 Ports
GPS	: Synchronize RTC with GPS time (Optional)
Firmware Update	: USB and FOTA
Real-Time Clock	: Resolution of 1 second with +/- 20 PPM
Internal Data Me	: System Reset upon system failure
Data Retrieval	: RS-232 Port / Pen Drive / LAN port
Power	: Universal AC Power
Mounting	: Din Rail Mounting
Dimensions	: L = 190mm x W = 160mm x H = 50mm
Operational Temperature	: 0° C to 60°C
Operating Humidity	: 0 - 95% RH
