COMMON METER READING INSTRUMENT (CMRI)

Make: ANALOGICS
Model No: ACM09000

Features

- 100% PC Compatibility in a Rugged Hand Held
- Runs DOS compatible OS and Virtually runs any PC Programs
- Fully PC Compatible, High Speed two Serial Ports runs with baud rates upto 115.2kbps, USB Port
- Single or Dual key operation for any meter reading
- QVGA Display enables to view phasor or load survery graphs on the spot
- TFT Disply screen with Backlight (16 rows, 40 charators per line, 320x240 pixel graphics)
- Write protected memory area for permanent storage of program tiles with guaranteed 1 million operations
- 30years calender, Lithium Battery backed Real Time Clock
- Lastest and State of the art Li-Ion 7.4V 5200 mAh for operation of more than 10 hours in the Held.
- Membrane Keypad (optional Elastomeric)
- rugged ABS Case with rubber boot for extra Impact protection
- CBIP compliznt (1.1.1)
- Customized to Your Specitication

* Optional features

Application

Meter Reading

Field Data Collection

Inventory control

Market Survery Analysis

- Rugged
- Lightweight
- Built-in IRDA*
- IR*
- GPS/GPRS*
- Versatile
- User Programmable
- Built-in Barcode Scanner*
- LPR*
- 4G Connectivity

Product Description

Analogics Tech India Ltd. specialized in the Design, Development and Manufacturing of wide range of Hand Held Computer for about 25years. Analogics has developed Hand Held Terminals that are used successfully in various cross function applicaions for Industrial, mobile, remote communications, automation and stands ahead of the competition in innovative race of integrating sophisticated technologies.

Analogics CMRI is a State-of-the-art-product for Meter Reading needs. CMRI is a Light Weight, Compact Instrument that is 100% compatible to a desktop DOS PC added with portability and ruggedness. The CMRI is compatible with almost all types of existing Electronic Energy Meters in the market.

Analogics CMRI is designed to run DOS and the vast majority of DOS Based PC applicaions comes with superlative features like LCD with TFT 320x240 pixel graphics, high-speed serial ports, USB port, 8GB Flash with battery backup and upgradeable with (SD-CARD 32 GB).

Specifications of CMRI - Model: ACM09000 (PCL1100SRU)

Power	:	7.4V 5200 mAh, Lithium Ion Rechargeable Battery

Environment

Storage Temperature	:	-20C to +70C
Operating Temperature	:	0 to +50C
Humidity	:	5-95% (non-condensing)

Specifications of COP3

Optical Band with	:	900 to 1000 nano meters
Power	:	Self Powered (very low operating power derived from RS232C signals)
Communication	:	9 pin standard RS232 (System side) width control lines like RS, CTS, DSR, DTR
Cable Length	:	0.5 mts. Standard (optional 1,2,3...meters)
Weight	:	Less than 1 kg

CMRI Custom Options

- Displays
- Logs
- Case Color
- Cables and Connectors
- Key pas Graphics
- I/O Interface
- Sealing
- 4G Connectivity

Analogics CMRI has great versatility. The CMRI is compatible with all kinds of Electronic Energy Meters avaliable in the market. This compatibility gives the uniqueness of its capability for multi purpose applications in multiple makes of meters

Salient Features.

Compatible to IEC 1107, PACT and ANSI standards. Narrow band IR for better noise immunity Galvonically isolated communication, No extermal power (self powered fom RS232C signals). High impact, Compact, ABS plastic casing.

COP3 (Common Optical Port):-

COP (Common Optical Port) Comes as an accessory with Analogics CMRI. Analogics has developed this innovative add on, for the convenience of meter readers in the field. With Analogics CMRI and Common Optical Port, meter reader may virtually read any meter in the field.

The Common Optical Port (COP-3) has been tested for proper operation with various branded Energy meters manufactured by M/s. Secure Meters, L&T, Elster HPL, L+G etc. The signle optical head, multi adaptro arrangement will facilitate a low cost, Universal Solution for meter reading through CMRI, GSM/GPRS, for AMR applicaions.
