Intelligent Interface Unit

MAKE: ANALOGICS

Features

- ABS plastic enclosure, easy to install, safe to use
- Multiple LEDs for indicating the device status of signals
- Highly reliable relays
  contact rating: ≤10A 250VAC/30VDC
- Adopts dedicated relay driver chip, with built-in fly back diode protection
- Onboard power supply isolation, provides stable isolated voltage, needs no extra power supply for the isolated terminal
- Onboard opto coupler isolation, prevent the relay from being interfered by high-voltage circuit
- Supports passive and active digital input, with bi-directional opto coupler isolation, built in debouncing algorithm

Product Description

This is an industrial grade Intelligent Interface unit (IIU) with 2 - Ch relay module, with 8-ch digital input, RS485 bus with Modbus protocol. It features embedded protection circuits such as power isolation and TVS diode, etc. It also comes with an ABS enclosure. Due to its fast communication, stability, reliability, and safety, it is an ideal choice for industrial control and monitoring applications.

Specifications

Power Supply	: 7~36V DC
Communication Interface	: RS485 / Wireless Mesh
Communication Format	: 9600, 8, N, 1
Relay Channels	: 2
Contact Form	: 1NO
Contact Rating	: ≤10A 250VAC/30VDC
Digital Input	: 8DI, 5~36V, passive / active input (NPN or PNP), built-in bi-directional opto coupler isolation
Communication Protocol	: Standard Modbus protocol
Rs485 Address	: 1~255
Led Indicators	: TXD: TX indicator, lights up when sending data RXD: RX indicator, lights up when receiving data
