4G LTE NIC CARD

Features

- ✓ Compact and Easy to install
- ✓ Supports: wirless communication with 4G LTE technology
- ✓ Supports MIOS compliant/ Modbus/ IEC 62056-21/ DLMS protocols for data collection from energy meters of any make and model
- ✓ Online monitoring of Virtual Billing parameters and Real-time Tamper events
- ✓ Power outage, Power Quality Management and Tamper Management
- ✓ Load Control
- ✓ GPS time synchronization from server for effective energy audit
- ✓ Energy auditing and accounting
- ✓ Two way communication, facilitating monitoring, controlling and administration
- ✓ Protection against harsh environment, EMI-EMC, AC Voltages, Surge etc.

Product Description

An advanced meter reading NIC Card which automatically collects data from Electronic Energy Meters and transfers the acquired data to the server with its in-built 4G communication technology. It is compact, easy to install in existing meter boxes and can be remotely configured or programmed.

Specifications

Processor	**CPU**	ARM
Power	**Support Bands**	TDD-LTE B34/B38/B39/B40/B41 FDD-LTE B1/B3/B5/B8
Memory	**RAM** **Flash**	16 MB 8 MB
Wireless Connectivity	**Connectivity**	FDD LTE CAT 1 DL: Max 10 Mbps; Ul: Max 5 Mbps.
Operating Conditions	**Operating Temperature** **Relative Humidity**	-10°C to 60°C 5 - 95% (Non-condensing)
